

Assignment 207: 夏任务 107: 运动检测摄像头

3120102153 傅益芳

连接一个 USB 摄像头，做一个 http motion jpeg 服务器

实验步骤

- 1、安装 motion
sudo apt-get install motion
- 2、连接摄像头
- 3、修改配置文件

```
GNU nano 2.2.6      File: /etc/motion/motion.conf

# Rename this distribution example file to motion.conf
#
# This config file was generated by motion 3.2.12

#####
# Daemon
#####

# Start in daemon (background) mode and release terminal (default:
daemon on
```

改成 daemon on

```
# Restrict webcam connections to localhost only (default: on)
webcam localhost off
```

改成 webcam localhost off

- 4、修改启动项

```
GNU nano 2.2.6      File: /etc/default/motion

# set to 'yes' to enable the motion daemon
start_motion_daemon=yes
```

改为 yes

- 5、启动摄像头

```
root@ubuntu:~# service motion start
* Starting motion detection daemon motion [ OK ]
```

- 6、打开网页
